

# Kill bills.

A valve that really aims high is one that reduces water and energy bills, lowers your carbon footprint and hits the target for building regulations Part G all at the same time.

Work out exactly how much each Wondervalue saves on the Water and Energy Calculator at [www.wondervalue.com](http://www.wondervalue.com).

And discover why so many homeowners, plumbers, installers, specifiers and architects set their sights on nothing less.
