...And now we've gone one better.

Well actually you could say we've gone several better. Meet the new range of thermostatic mixing valves from **Cottam and Preedy**. Available in 15 and 22mm with straight and angle connection options and both carry TMV3 / TMV2 scheme approvals. Like the the wondervalue, we've already got Part G covered - another great product from Cottam and Preedy.

But the real surprise is the price.

Call 0121 552 5281 or visit www.cottamandpreedy.com to discover more.
